EDUCATION

Columbia University in the City of New York

Expected: May 2026

GPA: 3.35

- Computer Science (Major), Mathematics (Concentration)
- Relevant Coursework:
 - AI, NLP, 3DUI & AR, UI Design, Innovation & Design Lab, Hacking 4 Defense, Fundamentals of Computer Systems, CS Theory, Data Structures, Advanced Programming, Databases,

WORK EXPERIENCE

Incite Institute – *Digital Humanities Intern* | New York, NY

09/2025 – Present

- Designing a UMAP-based visualization of archival images from The Elders Project using PixPlot to reveal visual and thematic connections across collections
- Coded **Python** scripts to clean, organize, and integrate image metadata for large-scale visualization and analysis
- Supporting **UI/UX design and maintenance** of the project website, ensuring clarity, accessibility, and up-to-date content
- Conducting background research on project funding, communication strategies, and forensic applications.

Columbia Biomedical Informatics Department – *Data/Software Engineer* | Remote

05/2025 – Present

- Built a **Python** script to deidentify patient and encounter IDs using UUIDs
- Improving **tkinter GUI** used for generating modeling reports
- Enhanced an Algorithmic Drift tool to detect performance shifts in CONCERN EWS models and identify failing inputs across clinical settings

Columbia University Irving Medical Center – *Web Developer* | Remote

05/2025 – Present

- Contribute to the development of a health resource hub website serving the Harlem/Washington Heights community
- Collaborate weekly with Dr. Hiral Shah and Dr. Divya Palanisamy to translate community and clinician feedback into design updates and content improvements
- Create interactive mockups with **Framer**, implement responsive layouts using **HTML, JavaScript, and CSS**, and integrate user surveys to inform feature design

Columbia University – *Quantitative Research Assistant* | Remote

05/2023 – 05/2025

- Conducting **data analysis, web scraping, and string matching** with a group of three research assistants using **Python, STATA, and Github** 20+ hours a week
- Supporting Professor Ebonya Washington's research on minority career trajectories in economics

SKILLS

- Languages: English, Mandarin, Korean
- Python, SQL, Pandas, Scikit-learn, C/C++, Java, HTML/CSS/Javascript/jQuery/Flask, React, React Native, Swift, Unity/C#, STATA, R, Figma, Github

EXTRACURRICULAR ACTIVITIES

Columbia DI Track & Field | Student-Athlete & Manager

09/2022 – Present

- Committed to 20+ hrs/week of practice, meets, travel, community service
- Managing social media @columbia.vertical.jumps using **figma** and **canva**

CAIAC AI Technical Safety Spring Fellowship | Member

02/2024 – Present

- Selected for CAIAC AI Technical Safety Fellowship to explore alignment and interpretability topics
- Meet weekly to read, discuss, and critique technical AI safety papers with fellows and mentors

Run New York City | Member

09/2024 – Present

- Meet weekly on Sunday to bring fun activities and teach running mechanics to children in the Bronx.

Columbia Space Initiative | Member

09/2024 – Present

- Participated in NASA SUITS student challenge; contribute to AR interface development during twice-weekly meetings
- Contributed to semester-long group project of proposal writing and developing autonomous path planning in Unity Hololens and Snapchat Spectacles
