

MICHELLE LEE

(917) 913-0599 | msl2229@columbia.edu | [portfolio](#)

EDUCATION

Columbia University in the City of New York

Expected: May 2026

- Computer Science (Major), Mathematics (Concentration)
- Relevant Coursework:
 - UI Design, Data Visualization, Writing with/on Computing (Data journalism), AI, NLP, Innovation & Design Lab, Hacking 4 Defense, Fundamentals of Computer Systems, CS Theory, Data Structures, Advanced Programming, Databases

INTERNSHIP EXPERIENCE

Incite Institute – Digital Humanities Intern | New York, NY

09/2025 – Present

- Supported the Obama Presidency Oral History Project by integrating data into the **CMS** and conducting digital content reviews for accuracy and consistency
- Leading end-to-end migration of organizational data from **Salesforce to Airtable**
- Maintained content updates for Incite's website (news, project announcements, and UX features), ensuring timely publication
- Applied **systematic tagging/labeling** to interview transcripts, coordinated upload and organization for publication workflows
- **Audited** and quality-checked transcripts across multiple Oral History projects against style guide standards
- Designed and implemented a **UMAP-based visualization** of archival images from The Elders Project using PixPlot to reveal visual and thematic patterns for archival research

Columbia University Irving Medical Center – Web Developer | Remote

05/2025 – Present

- Led end-to-end development of a health resource hub serving Harlem and Washington Heights, translating public health needs into accessible, user-centered web experiences
- Worked directly with clinicians and community stakeholders to synthesize feedback into iterative design and content updates, improving clarity, accessibility, and trust in health information delivery
- Created interactive **Figma** prototypes and implemented responsive frontends using **HTML, CSS, and JavaScript**

Columbia Biomedical Informatics Department – Data/Software Engineer | Remote

05/2025 – 01/2026

- Built Python-based deidentification pipelines using UUIDs to securely anonymize patient and encounter data, supporting HIPAA-compliant research workflows
- Improved an internal Tkinter GUI used to generate modeling reports, increasing usability for research and clinical users

PROJECTS

Hacking 4 Defense | Group Member, Front-End

09/2025 – Present

- Partnered with the U.S. National Guard in the **Hacking 4 Defense** program to improve the military driver licensing process through a combined technical and policy approach.
- Conducted stakeholder interviews and analysis before building an **MVP** Military License Assistant using **Figma** and **React**
- Submitted a **policy proposal** picked up by the Adjutant General and presented work that drew interest from the **National Guard Bureau's J84 Innovation Branch** for continued exploration

SKILLS

- Languages: English, Mandarin, Korean
- Python, Pandas, C/C++, HTML/CSS/Javascript, D3, SQL, React, STATA, R, Figma, Github, Salesforce, Airtable

EXTRACURRICULAR ACTIVITIES

Columbia DI Track & Field | Student-Athlete -> Manager

09/2022 – Present

- Committed to 20+ hrs/week of practice, meets, travel, community service
- Managing social media @columbia.vertical.jumps using **figma** and **canva**

Blue and White Magazine | Member -> Digital Works

09/2022 – Present

- Currently lead coding and implementation for digital projects

CAIAC AI Technical Safety Spring Fellowship | Member

02/2024 – 09/2025

- Meets weekly to read, discuss, and critique technical AI safety papers with fellows and mentors
