EDUCATION

Columbia University in the City of New York

Expected: May 2026

GPA: 3.4

- Computer Science (Major), Mathematics (Concentration)
- Relevant Coursework:
 - AI, NLP, 3DUI & AR, UI Design, Innovation & Design Lab, Hacking 4 Defense, Fundamentals of Computer Systems, CS Theory, Data Structures, Advanced Programming, Databases,

INTERNSHIP EXPERIENCE

Incite Institute – *Digital Humanities Intern* | New York, NY

09/2025 – Present

- Designed and implemented a UMAP-based visualization of archival images from **The Elders Project** using PixPlot, enabling researchers to explore visual and thematic relationships across thousands of digitized assets
- Assisted with **UI/UX design** and **quality assurance** for the **Obama Presidency Oral History Project** and **Movements Against Mass Incarceration Lab**, ensuring accurate transcript display and consistency across production CMS platforms
- Leading full migration from a customized **Salesforce** system to **Airtable**, redesigning data schemas and workflows to improve maintainability, usability, and cross-team collaboration

Columbia University Irving Medical Center – *Web Developer* | Remote

05/2025 – Present

- Led end-to-end development of a health resource hub serving Harlem and Washington Heights, translating public health needs into accessible, user-centered web experiences
- Worked directly with clinicians and community stakeholders to synthesize feedback into iterative design and content updates, improving clarity, accessibility, and trust in health information delivery
- Created interactive **Figma** prototypes and implemented responsive frontends using **HTML**, **CSS**, and **JavaScript**

Columbia Biomedical Informatics Department – *Data/Software Engineer* | Remote

05/2025 – 01/2026

- Built Python-based deidentification pipelines using UUIDs to securely anonymize patient and encounter data, supporting HIPAA-compliant research workflows
- Improved an internal Tkinter GUI used to generate modeling reports, increasing usability for research and clinical users

PROJECTS

Hacking 4 Defense | Group Member, Front-End

09/2025 – Present

- Partnered with the U.S. National Guard in the **Hacking 4 Defense** program to improve the military driver licensing process through a combined technical and policy approach.
- Conducted stakeholder interviews and workflow analysis before building an **MVP** Military License Assistant
- Submitted a **policy proposal** picked up by the Adjutant General and presented work that drew interest from the **National Guard Bureau's J84 Innovation Branch** for continued exploration

Pole Vault Digital Exhibition | Personal Project, Full-Stack

11/2025 – Present

- Designed and built a full-stack digital exhibition, combining **Figma-based UX/UI planning** with custom **HTML/CSS/JavaScript** development
- Applying digital exhibition and curatorial design principles to structure content, visuals, and user flow

SKILLS

- Languages: English, Mandarin, Korean
- Python, SQL, Pandas, Scikit-learn, C/C++, Java, HTML/CSS/Javascript/jQuery/Flask, React, React Native, Swift, Unity/C#, STATA, R, Figma, Github, Salesforce, Airtable

EXTRACURRICULAR ACTIVITIES

Columbia DI Track & Field | Student-Athlete & Manager

09/2022 – Present

- Committed to 20+ hrs/week of practice, meets, travel, community service
- Managing social media @columbia.vertical.jumps using **figma** and **canva**

CAIAC AI Technical Safety Spring Fellowship | Member

02/2024 – 09/2025

- Meets weekly to read, discuss, and critique technical AI safety papers with fellows and mentors
